- Graphic Designer
- Strong Communication
- User Flows
- Problem-Solving

Language

- English
- Hindi

A passion for designing that lets me fill the creative gap in any project. I had developed an attachment for designing at an early age and planned to transform my dream into a reality by pursuing a career in the same. My motive is to make other people picture the same idea that had taken root in my brain by my design. A team player and communicator in my field.
